Profil

I am a programming enthusiast with theoretical skills and experience in developing websites using HTML, CSS/SCSS, PHP (Symfony), JavaScript, TypeScript. Despite the lack of professional experience in the IT industry, I am programista i przekształcić moje zainteresowanie w pełnoprawną karierę w tej determined to develop myself as a programmer and turn my passion into a full fledged career in this field. I have a portfolio website that I created myself, which allowed me to gain practical knowledge and skills in programming.

Education

Middle, Bogodukhivka NVK, Cherkasy

SEPTEMBER 2010−SEPTEMBER 2022

After graduating from high school with good grades, I received a healthy dose of knowledge and skills in various subjects from 2010 to 2022. My studies were successful, and the school environment contributed to my personal and professional development.

Engineer, Higher School of Business and Administrationi, Lublin

OCTOBER 2022−CURRENTLY

I am currently studying at WSPA in Lublin for a degree in Computer Science from October 2022. My academic studies focus on developing technical skills and understanding modern programming and software development concepts.

Projects

Portfolio Site – PHP(Symfony)

My portfolio site is written from scratch in php with the symfony and doctrine framework using SASS technology.
